

Hass

Bond Mill Elementary School

January 15, 2010

Dear Parents,

Happy New Year! Yes, it is time to begin the Science Fair Project. To help you and the children out, we have set up some deadlines and will give them less homework on Tuesday nights to allow them time to work on their project.

The following is a list of important dates for you and your child to know and follow.

Due to County guidelines, projects involving any vertebrate, must be approved by a School Review Board by February 6, 2010.

January 19 Signed Parent Letter due

January 26 Problem and Hypothesis are due to teacher.

January 29 Students should begin to gather their materials and equipment. Students should set up their investigation and begin to gather data in their logs. Please have them read the information they brought home to help make sure they have a well-designed investigation and are testing only one variable.

February 5 Materials list and Procedure are due to teacher.

February 17 Turn in data log to their teacher for suggestions and to make sure they are following the scientific process.

March 12 Turn in their data and graph with a written summary interpreting their data. Work on their conclusion.

March 23 Completed project is due to their teachers. Science Fair is this evening from 7:00 - 8:30 p.m.

Every child is expected to turn in a completed science project on March 23, 2010. As it is our science focus for the third quarter, all children are expected to complete the project.

If you have any questions, please do not hesitate to call or email. We hope that this will be a learning adventure for all children and we will provide them with feedback throughout the experience. Thanks for all your help in advance.

Justin Fitzgerald, Principal

Sincerely,
Mrs. Hass, Ms Jacobs, Mrs. Lally
